É bom ambiente.

But, when Mac passed by the park on the way to school, he noticed something very disturbing. Under the big tree were broken glass bottles and empty soda cans.

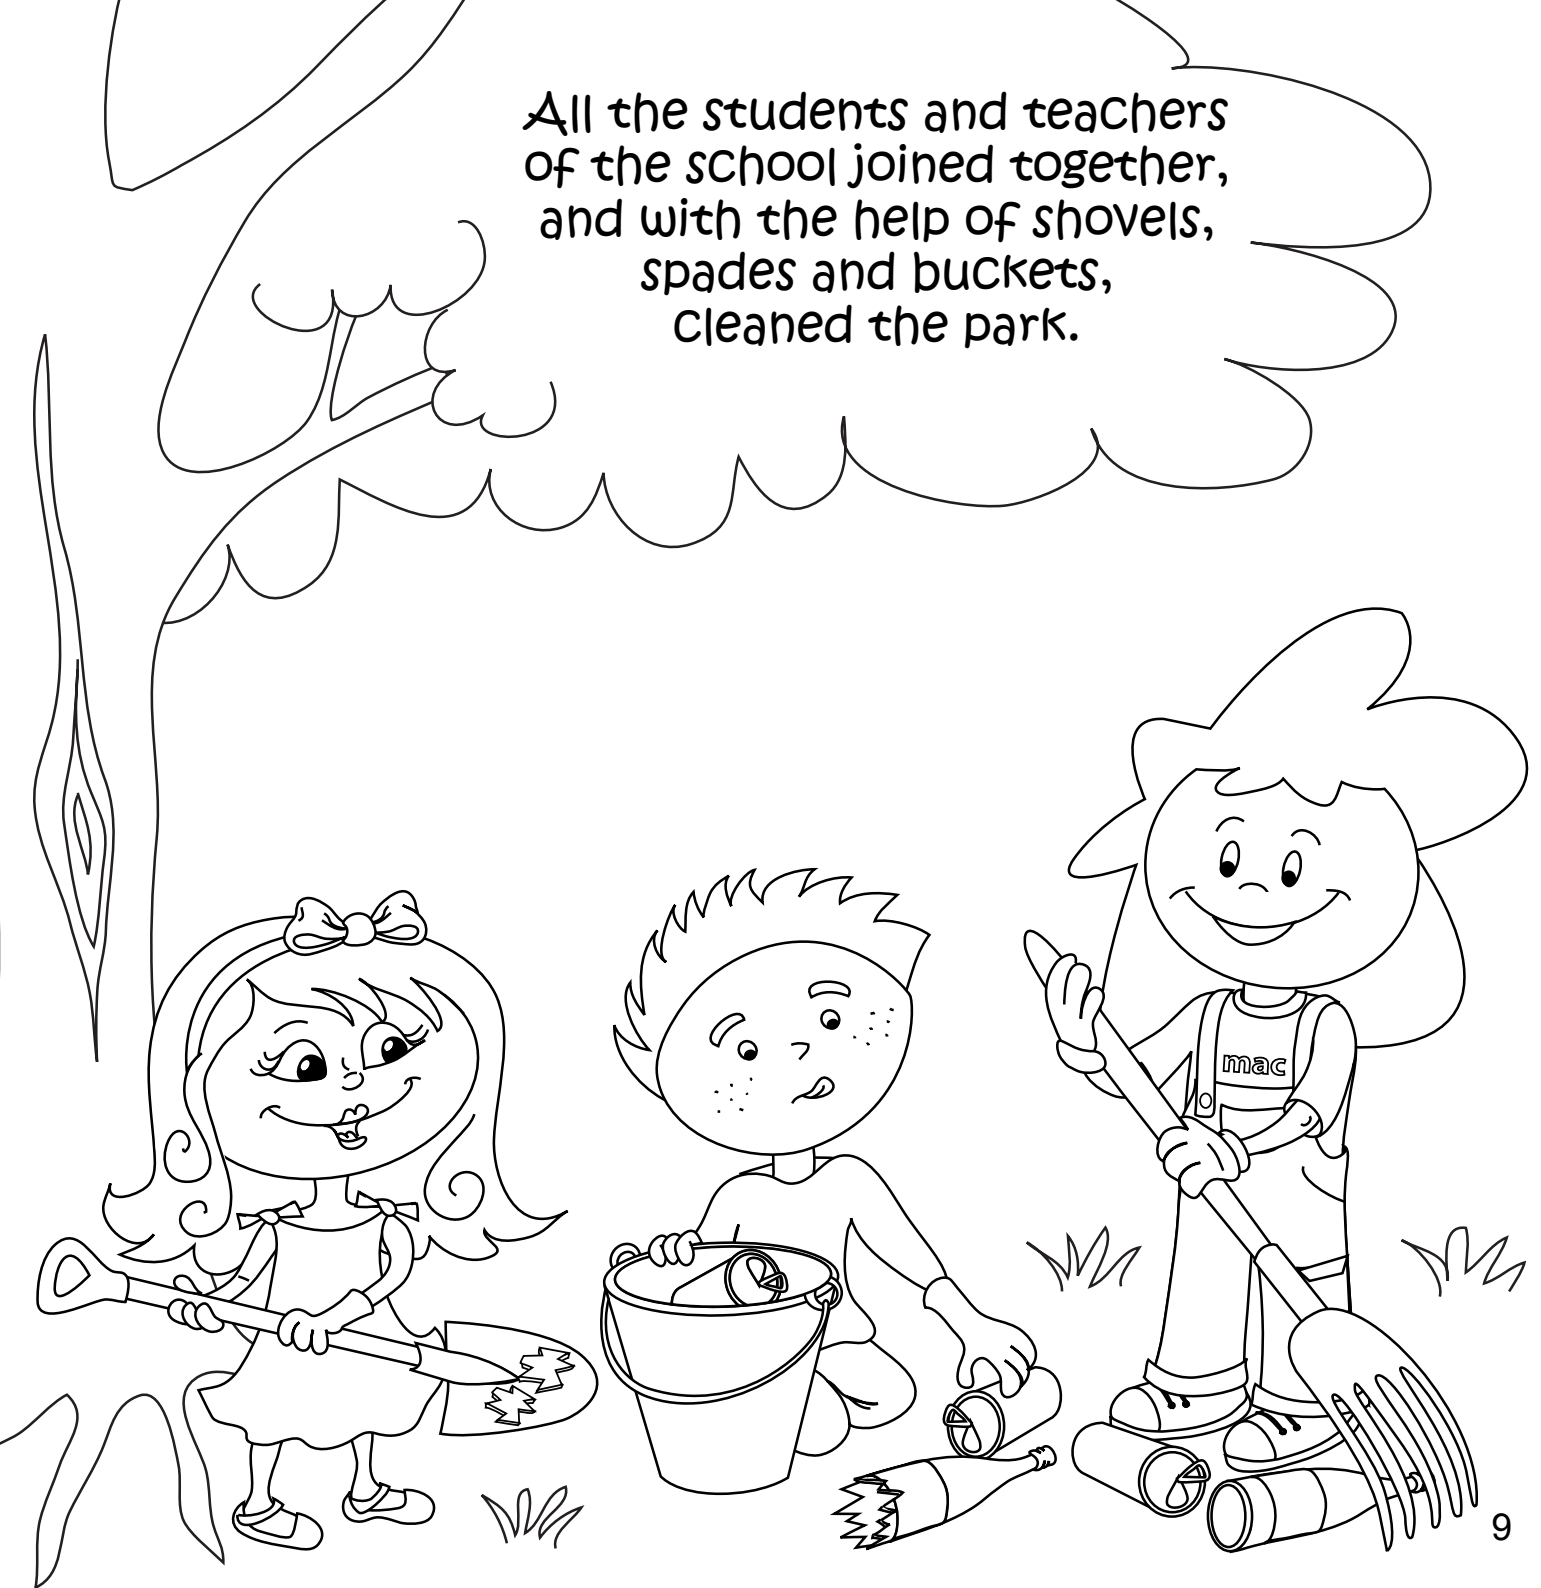

How dangerous, he thought. Somebody can get hurt!

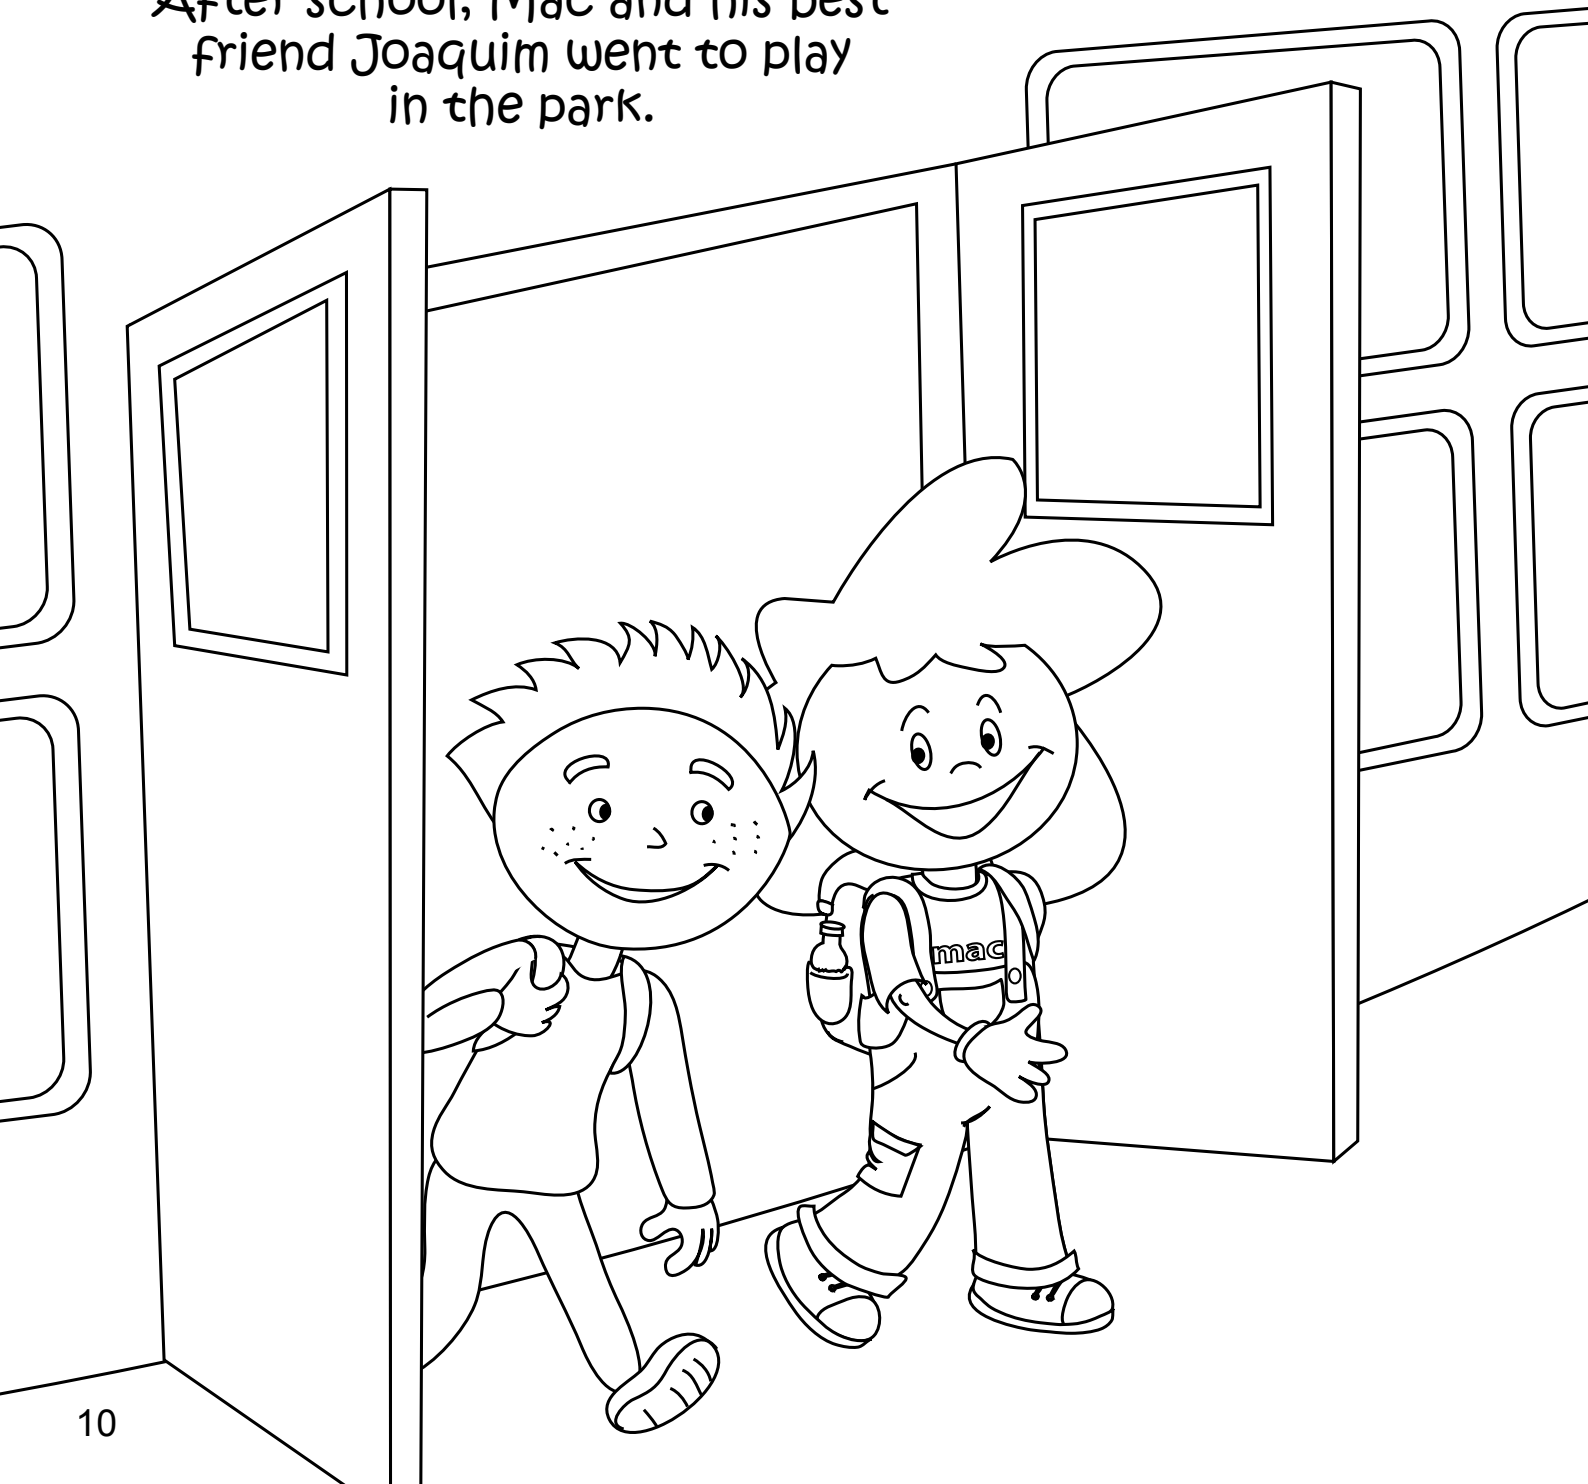

Immediately as Mac arrived to school, he rushed to let the Teacher know what he had seen.

All the students and teachers
of the school joined together,
and with the help of shovels,
spades and buckets,
cleaned the park.

After school, Mac and his best friend Joaquim went to play in the park.

But there was a surprise waiting for them.
More garbage was found under the exact
same tree in the Park!
How could it be?
Who or what was responsible?

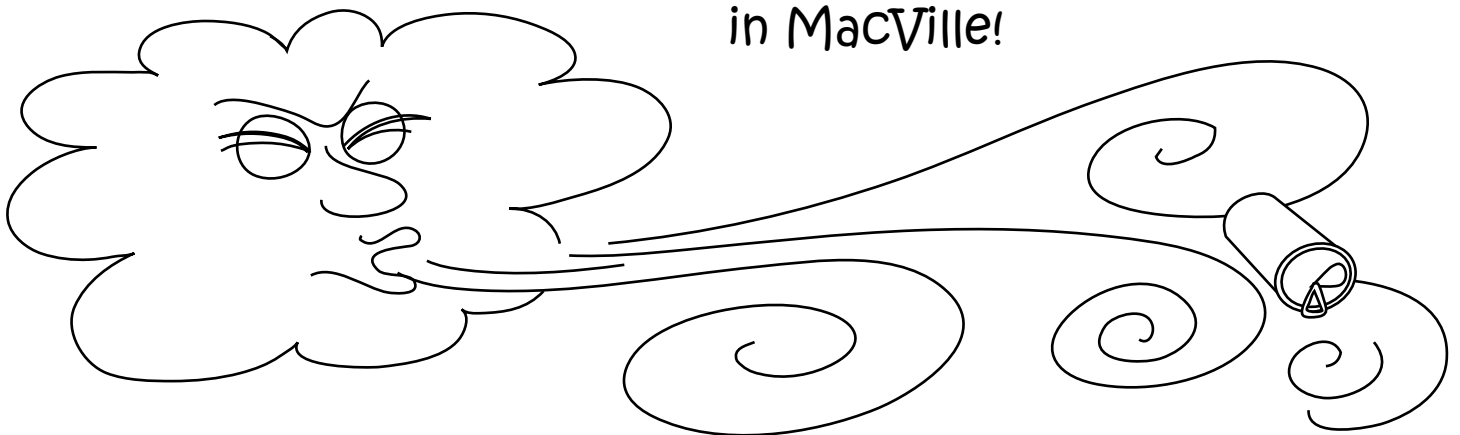

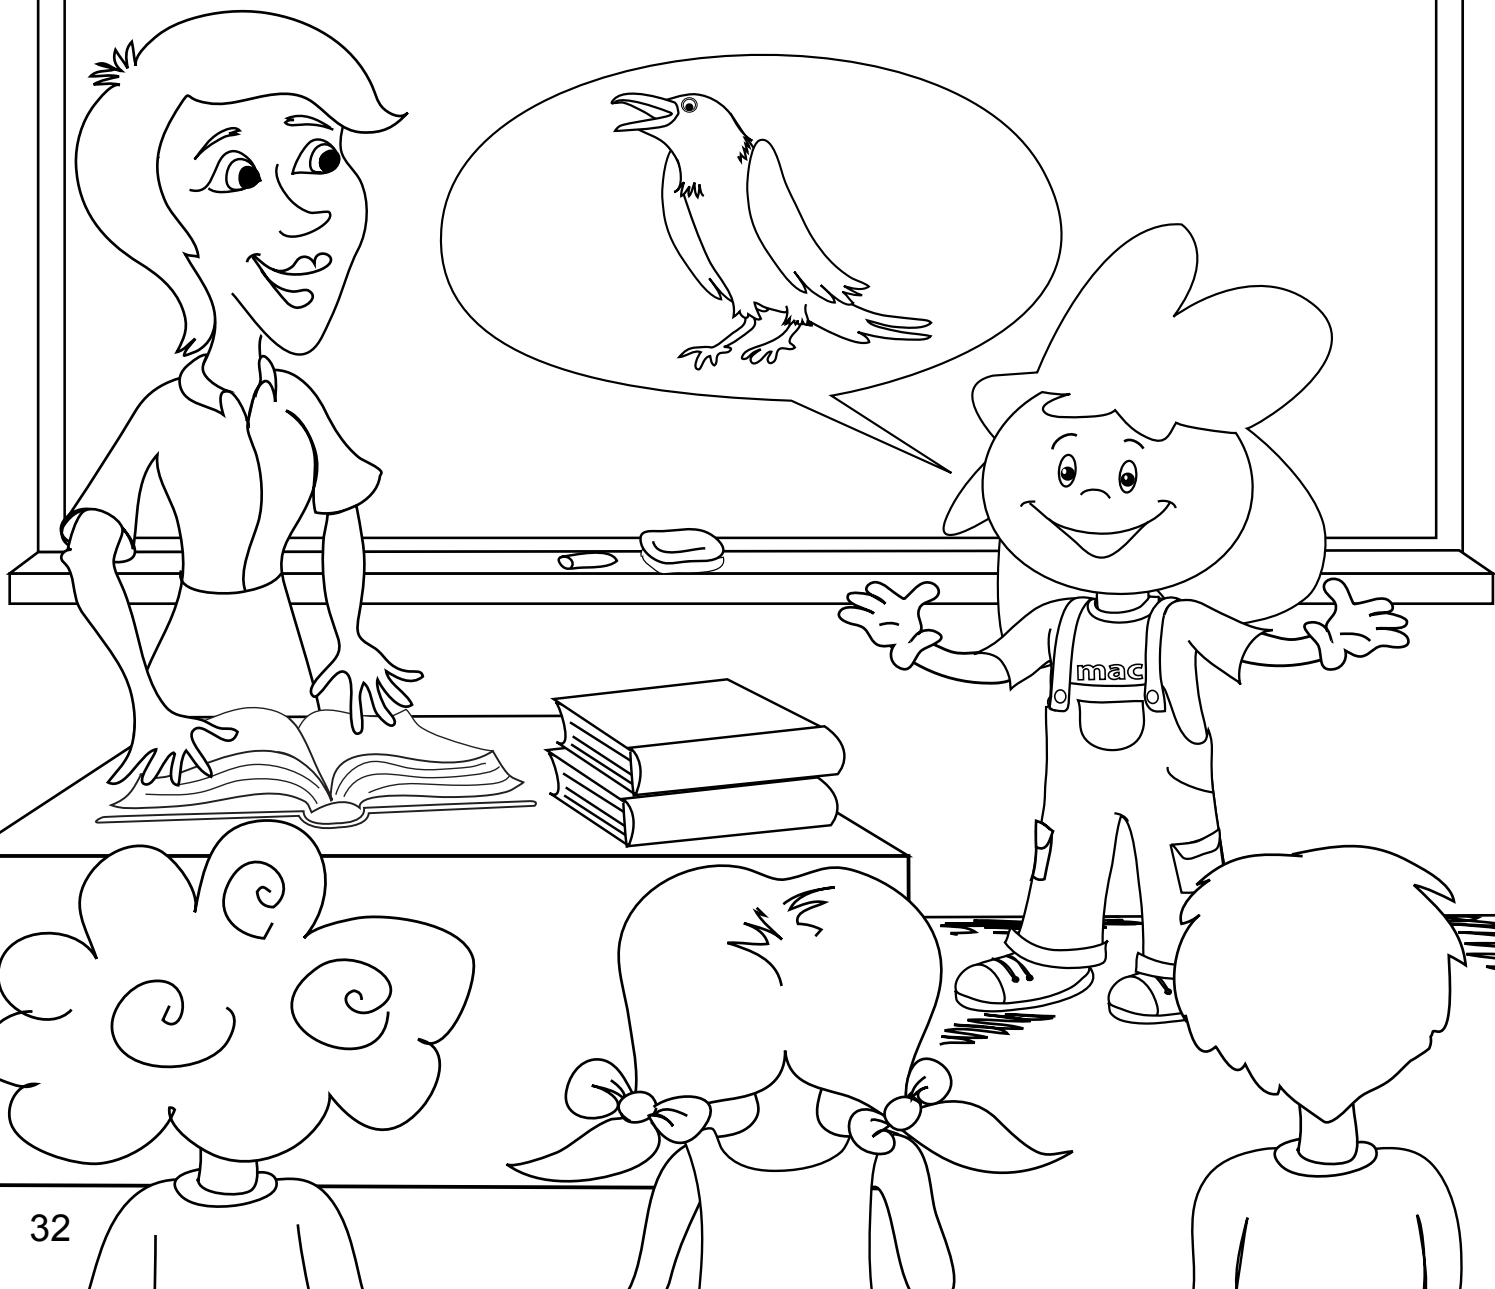

Someone said, that Somebody said,
that they thought someone
was dirtying the park purposefully!

Others tried to think of different reasons,
such as, Maybe the wind caused the
garbage to be flown out of the garbage cans!

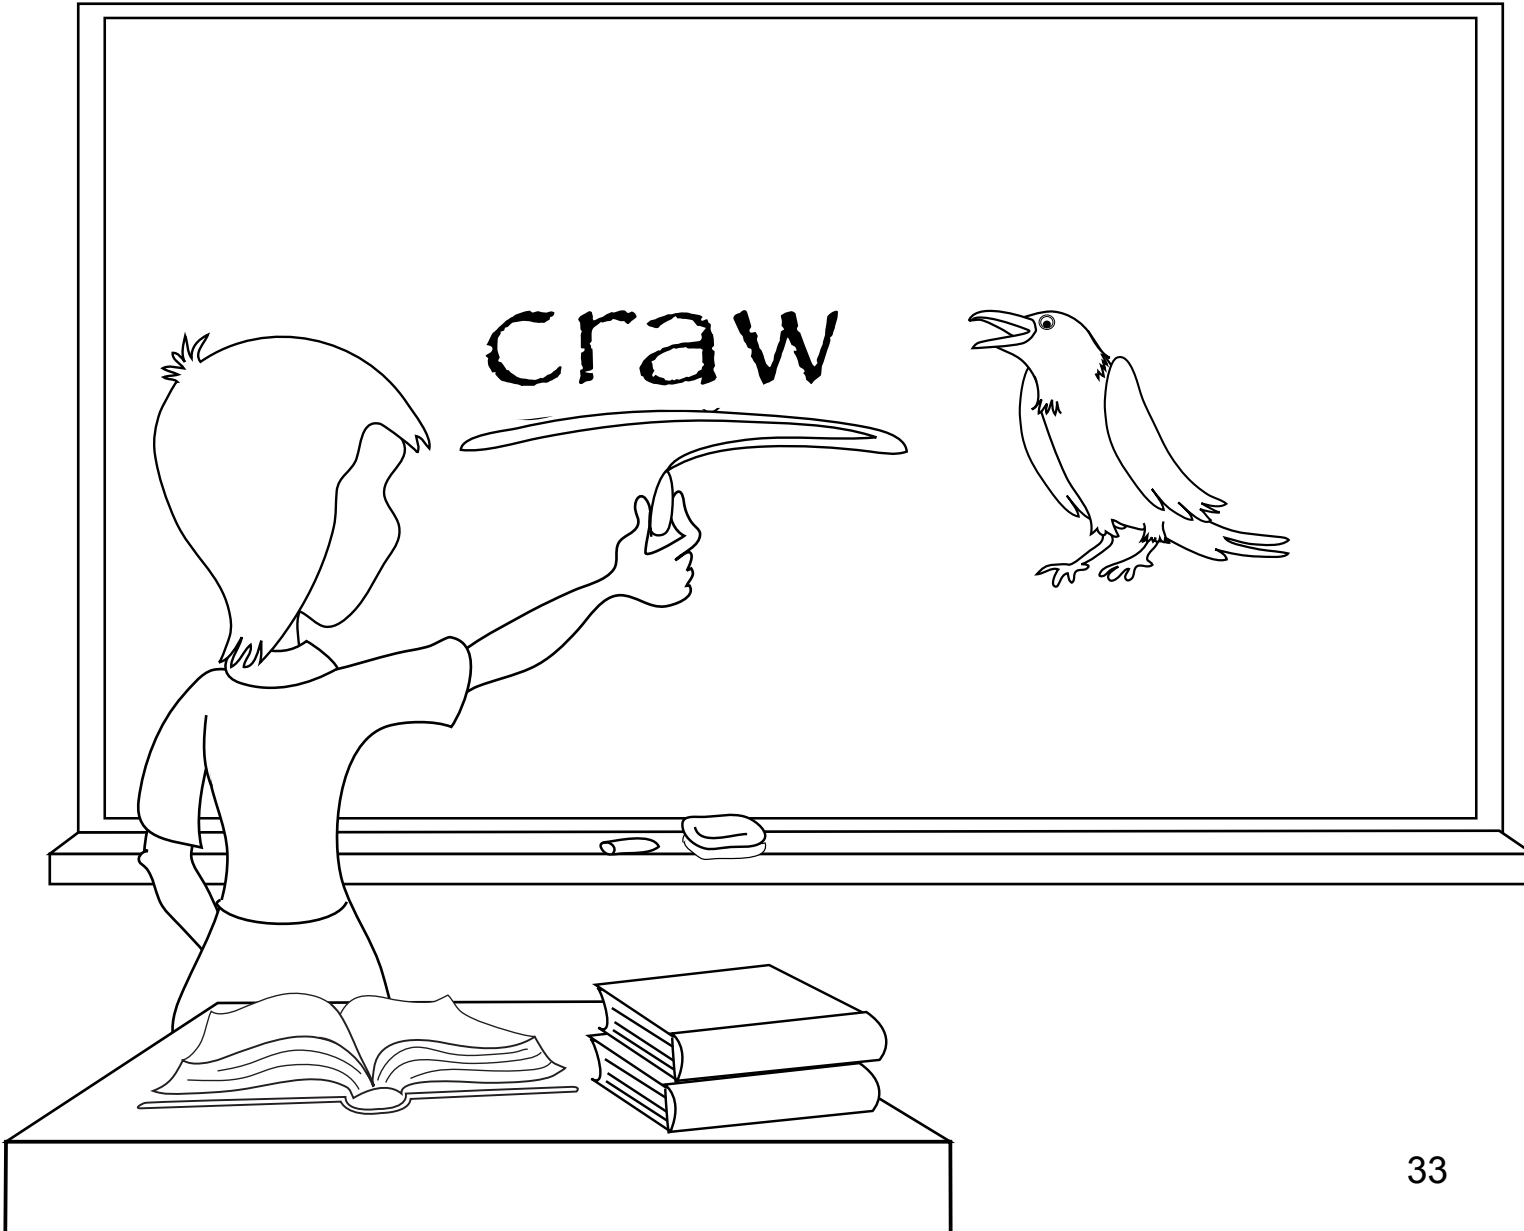

But it wasn't windy at all that day
in MacVille!

The next day, Mac told his whole class about the story of Toby the Crow and how the mystery of the re-appearing shiny garbage was finally solved!

The teacher explained how crows simply love shiny objects and the whole class started to laugh.

After school,
the teacher and all the students
went out into the park to meet
Toby the Crow
who explained to them
what he learned from
his mistake.
